USA

## Description

LcT has developed an innovative solution for producing 3D sound from mono, stereo, or 5.1 surround sound. Our technology simulates the human hearing system, giving the listener a full 3D acoustic experience on their smartphone, tablet, gaming device, laptop, computer, virtual reality device, or other mobile device with headphones. Listeners can feel the sound coming from all directions and distances.

## Applications:

- 3D Music
- 3D Games
- 3D Movies
- 3D Television
- 3D Sound Systems
- 3D Virtual Environments

## Devices:

- Smartphones
- Tablets
- Gaming devices
- Laptops

## Features:

- Binaural Sound
- Low-cost Software Solution

## Technology Solutions

LcT can provide the following low cost, easy-to-implement solutions:

- 3D sound driver for smartphone, tablet, or other mobile device. Our engineering team will ensure best performance in the customer's application.
- 3D sound software for games, video, virtual reality, computer, television, and film to convert mono or stereo to 3D sound.
